

# HANDY TAPER

For Cinema

Tape Splicer for Cinema / Photo / Micro Film / etc.

This product was developed in 1963 exclusively as a splicer for movie film.

Since that time, our splicers have been widely accepted as standard film splicing equipment both domestically and overseas. Our splicers have been extensively used in the electronics industry since 1975 and, from 1990, as the most suitable piece of equipment in the high density field of TAB/TCP (Tape carrier package.)

## Features of Handy Taper

- We are justly proud of our 40 year record of achievement and technological advances since the development of the Handy Taper in 1963.
- The Film Cutter is constructed of stainless steel with a special coating on the blades to prevent rust.
- The blade dice is of rustproof stainless steel.
- The Tape Cutter itself is similar to a razor blade which reduces cost and facilitates easy replacement.
- The registration pin is designed with 8 pins for simple operation.
- Simple operation coupled with a well-balanced design makes smooth punching of the sprocket holes extremely straightforward.
- Solid body and special design enables precision work at all times .

## Splicing Tape

| Splicer | Tape Size      | /Pack    | /Carton Box | Clear | Yellow | Zebra |
|---------|----------------|----------|-------------|-------|--------|-------|
| HT 16   | 15 . 5mm x 10m | 12 rolls | 360 rolls   |       |        |       |
| HT 35   | 24mm x 10m     | 8 rolls  | 240 rolls   |       |        |       |
| HT 70   | 24mm x 10m     | 8 rolls  | 240 rolls   |       |        |       |
